

COMMUNITY PHARMACY GUIDE TO THE COMMISSIONING LANDSCAPE FOR**COMMUNITY PHARMACIES Wandsworth Local authority****SECTION D Commissioning Landscape Local Authorities – Public Health Commissioning.****Introduction**

The Local Authorities (LAs) in England took on responsibility for commissioning the majority of public health services from 1st April 2013. Each LA has a **Health and Wellbeing Board (HWB) which provides strategic oversight and bringing together all the local commissioners.**

- HWBs have a responsibility for producing the **Pharmaceutical Needs Assessment (PNA)**, this is used by NHS England improvement to **determine access to pharmaceutical services through Market entry.**
- The LAs with CCGs have **joint responsibility for producing the Joint Strategic Needs Assessment (JSNA)**, through the HWB; the JSNA helps to determine the PNA.

In SW London there are 6 LAs, who commission public health services such as sexual health, drug misuse and stop smoking. Community Pharmacy has a major role to play in Public Health due to the access that is provided.

You should note the following

- Community Pharmacy has Public health built into the CPCF such as health promotion campaigns, sign posting and self-care.
- Community pharmacy offers the best public access to patients which offer potential for public health interventions.
- It is important you understand the role of Community Pharmacy and Public health and the local health needs of your area i.e. non-English speakers, long term conditions and patient access to health services.
- **The PNAs will determine the need for Community Pharmacy services- make sure to get involved in the consultation and read the PNA to understand what the local needs where your pharmacy is located.**
- **Some of the new pharmacy services in the CPCF have a public health prevention role i.e. smoking cessation service, contraception**

This guide is split into each LA borough, showing what services are commissioned, the commissioner contact and how you get accredited.
