

Recognising the Acutely Unwell Patients

Date - 5th November 2025

Time 10:00 - 12:30

This 2-hour workshop equips non-clinical reception staff with the knowledge to recognise and respond to acutely ill patients, both adults and children.

It covers key emergency conditions—including chest pain, breathing difficulty, sepsis, stroke, DVT/PE, fever in children, and psychiatric emergencies—and the vital role of the non-clinical team in these scenarios.

Highlights

We have hit a milestone!

We're incredibly grateful for the continued support and engagement from our partners and stakeholders across South West London. Communication and collaboration are at the heart of everything we do, and we're committed to continuing to grow, listen, and connect. We're thrilled to share that our LinkedIn page has now surpassed **1,000** followers (we might just be leading the way nationally!) — thank you for being part of our journey. Stay connected by joining our mailing list, following us on LinkedIn, and subscribing to our new WhatsApp channel for the latest updates.

Featured Event

Treat Antibiotics Responsibly: Improving Antimicrobial Stewardship in Primary Care

Date: Wednesday 19th November 2025

Location: The Grange, Beddington Park, London

The TARGETing Better Patient Outcomes: AMS Essentials and Updates for Primary Care Teams workshop brings together GPs, ANPs, Pharmacists, Paramedics, Physician Associates, and Nurses from across South West London. Focusing on antimicrobial stewardship, safe prescribing, and updates on recurrent UTIs and pneumonia. The event features expert speakers including Dr Katja Doerholt, Dr Vasa Gnanapragasam, and Lilian Li.

Participants will gain practical tools and strategies to improve antibiotic use, align with CQC standards, enhance patient communication, and strengthen governance in primary care. The day aims to promote responsible prescribing and protect the long-term effectiveness of antibiotics while improving patient outcomes.

Resources

Career Pathway Tool

If you are considering a career in health and care, this tool has been developed to help you understand the types of roles available at different levels. It also demonstrates example progression pathways and opportunities to transfer between the different sectors in health and care – if you are already working in the sector, the tool can help with your next career move decision.
